

NFTC is building a pure fibre optic network to provide ultra-high-speed internet, digital television, and more to your home. Once complete, your household will be able to work, stream, and play faster than ever before.

We are requesting your consent to perform work on the exterior of your property.

How will the work get done?

This pre-work will **not cost you anything if your house is less than 250m from the road**. If your home is further than 250m from the road, you may be subject to some installation charges, but these rates will be presented and agreed upon before groundwork is completed. In any case, **you do not need to be home during the installation**.

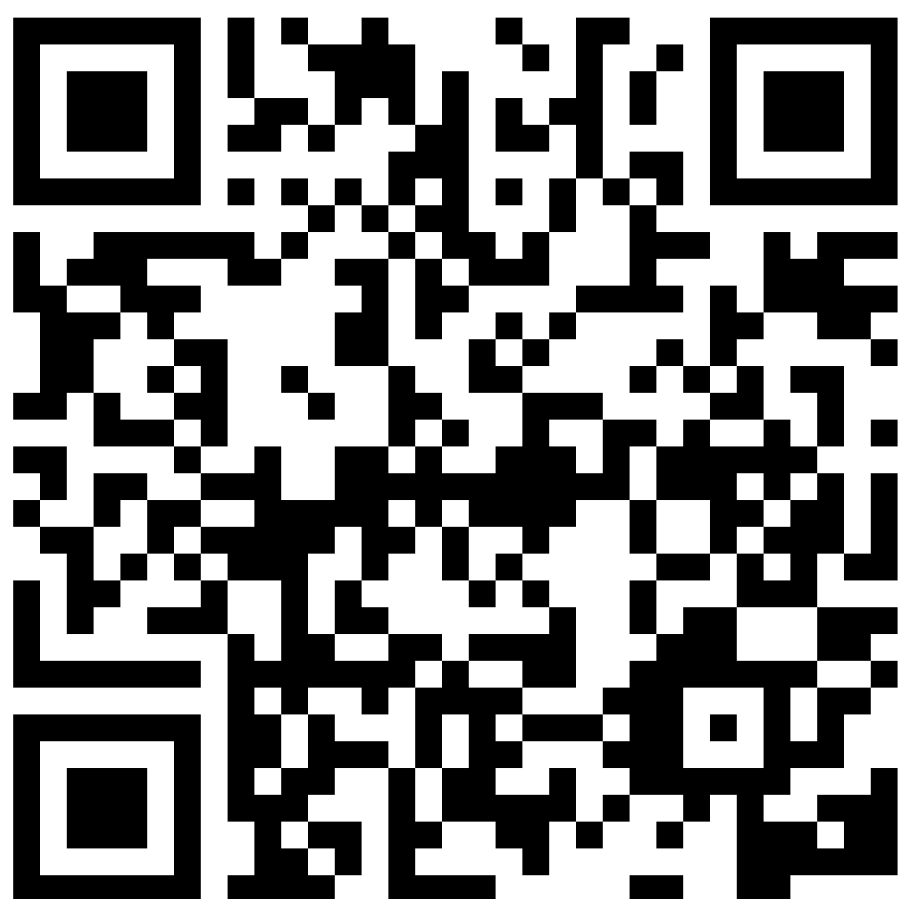

The pre-work will involve **making a narrow pathway** (via mini-trencher or hand-spade) slightly below ground (approx 4"-6") or running an aerial line, **attaching the cable to the exterior of your home, and putting a small coil of wire to the side of your building**.

This **pre-work may cause minor ground disturbances on your property** (i.e. lifting interlocking brick or moving patio stones). **NFTC will always take the time to leave your property in the same condition in which we found it**. We will only be responsible for claims that the work has not been completed as specified.

To provide your consent

Please use the QR code below to fill out our pre-work consent form for your address. If you're unable to use the QR code, you can use the direct link to the right.
